

# Mega Flygon Almost Existed

Unfortunately, the team couldn't "complete a design" for the Pokémon.

By Shawn Wilkins. Posted 04/23/2015 17:00 [Comment on this](#) [f](#) [t](#) [g](#) [ShareThis](#)

Nintendo Dream held an interview with Game Freak's own Ken Sugimori, Shigeru Ohmori, Shigeki Morimoto, and Kazumasa Iwao, all of whom worked on *Pokémon Omega Ruby* and *Alpha Sapphire*. During their time together, Sugimori revealed the sole reason Mega Flygon doesn't exist: artist's block. It could go without saying that this is possibly the reason why many of our favorite Pokémon don't have Mega Evolutions, but it's incredible that something so minor can have such a lasting effect on a game's biggest new improvement.

**Sugimori:** For Aarune, he needed to have a Pok20mon that could use the moves Fly and Secret Power, which are perfect moves for finding Secret Bases. And the only Hoenn Poéemon that wasn't used by a key character that fit that criteria was Flygon. It does not Mega Evolve, but I really like Flygon.

**Interviewer:** Key characters often carry a Pokémon that can Mega Evolve, but Flygon is an exception, right?

**Sugimori:** Flygon has had the potential to have a Mega Evolution since XY, but we were unable to complete a design and so it was dropped from consideration.
